Vacuum Pumps

Dimensions Performance Data

1 January 2007 Rev. 0 subject to change without notice supersedes all previous data printed in the U.S.A.

Screw Type **DPS100**

PUMP MODEL NO. e-vac ™DPS100

Dry running, Twin Screw, Horizontal **PUMP TYPE**

STAGES

ROTATION SPEED 3600 rpm

110 ACFM (190 m³/hr) NOMINAL PUMP CAPACITY

ULTIMATE VACUUM < 0.2 torr (0.27 mbar)

ANSI 2" 150# Raised Face **INLET CONNECTION SIZE**

ANSI 1 1/2" 150# Raised Face **OUTLET CONNECTION SIZE**

PUMP INTERNAL PRESSURE RATING 100 psig (6.9 bar)

MATERIALS OF CONSTRUCTION

Stator Ductile Iron, PTFE coated Ductile Iron, PTFE coated Rotors

BEARING TYPE AND LUBRICATION

Roller, Vacuum grease packed High Vacuum End

Double Ball, Oil Splash Low Vacuum End

SHAFT SEAL ARRANGEMENT

FAX: 866-551-2352

High Vacuum PTFE Lip seals / Labyrinth

PTFE Lip seals / Labyrinth / Gas Purged seal Low Vacuum

DRIVE TYPE Direct drive with integral gear box

440 Lbs (200 kg), {800 lbs (363 kg) with motor & base} WEIGHT

COOLING WATER ARRANGEMENT Direct Water Cooled

COOLING WATER 1/2 inch NPT, In/Out

85 $^{\circ}$ F (30 $^{\circ}$ C) for higher temperatures, please advise. Maximum Inlet Temp

Variable

30° F (17° C) Typical Temp Rise

1.0 - 2.0 gpm approx. Typical Flow Rate

60 psig (4 bar) **Pressure Rating**

OVER TEMPERATURE SWITCH Standard Nema 7

Setting

<85 dBA NOISE LEVEL

SEAL PURGE TYPE Air or Nitrogen*

Flow Rate & Pressure 1 scfm @ 6 psig(25 liters/min @ 0.3-0.5 bar gage)

Air/Nitrogen/Exhaust gas* GAS BALLAST TYPE

Flow Rate & Pressure 1 scfm @ 2 psig (25 liters/min @ 0.14 bar)

10 Hp (7.5 KW), TEFC, 460 Volt, 3 phase, 60 Hz INSTALLED POWER (Motor HP)

POWER REQUIREMENT AT VACUUM 7.5 Hp (5.6 KW)

^{*} The purge/ballast gas is selected for suitability with the process gas.
